

## Smart Lighting & Interior Design

Lighting plays an important role in interior design. Perfect lighting design can create ambience that matches deco and furniture, increase depth of your space, and highlight the pattern and texture in your home.

Consumer wants more, such as the ambience in your home needs to change according to your mood, the spacious occasions, and even the different time in a day.

Traditional dimming system provides some assistance, but it's not enough. Thanks to recent technology development, nowadays smart lighting is able to help your lighting design more vivid and dynamic.

# BLTC Resources

We have a complete product portfolio for lighting designers to realize their ideas in the interior design.

## Ambiance Lighting

Ambient lighting plays an important role as the main source of indoor lighting. Our LED driver, downlight, T5 batten, and most bulbs are suitable for this occasion.

## Task Lighting

Lighting designer uses special luminaire or indirect lighting to strengthen lux in some particular area. BLTC's LED driver, T5 batten, spot light and bulb are usually used for this purpose.

## Accent Lighting

To focus the deco or painting on the wall, interior designer will adopt track light or other spot light luminaire. BLTC's small wattage LED driver and spot light are perfect choices.
